

# To Developers From Developer

Htain Lin Shwe (saturngod)

Who am I ?

- Working in 2c2p, Singapore
- iOS Developer
- Working as programmer for around 8 years
- Using Objective-C , Swift , Javascript (nodejs)

# Apps

# Books

- HTML 5 ( <http://books.saturngod.net/HTML5/> )
- Programming Basic ( [http://books.saturngod.net/programming\\_basic/](http://books.saturngod.net/programming_basic/) )

# Essential Skills For Developers

Language

The most important  
language

English

Why ?

# Why

- We are doing copy & paste
- All new tech news are in English
- All new tech books are in English

# Recommend Books

Work Smart not work  
hard

# Work Smart not work hard

# We are too busy

Be Relevant, Stay  
Relevant

# Be Relevant, Stay Relevant

- upgrade yourself
- Live as if you were to die tomorrow. Learn as if you were to live forever. (Mahatma Gandhi)

Enjoy the Moment

# Enjoy the Moment

- Proud to be developers
- Try to be happy if you can successfully compiled or can run smoothly
- Just accept it, Software has bugs. This is normal
- Live as if you were to die tomorrow

Respect Time

# Respect Time

- Don't over promise
- Don't be late
- if you will be late , just call them and tell them , “I will be late”

# Responsibility of developer

# Responsibility of developer

- Test your own program
- We didn't call Tester, they are "Quality Assurance"

# Responsibility of developer

- Before starting understand the start point and end point
- If you don't understand the system, don't write it
- Try to ask until you really understand the system

# Responsibility of developer

- Live as if you were to die tomorrow. Learn as if you were to live forever. (Mahatma Gandhi)
- So, write the clean code
- Write a code for your love, for your best friend
- Don't do hard code , please use config file

# Responsibility of developer

- Do the document
- Follow the Style Guide

UML, Flow chart

# UML, Flow chart

- To understand the system between developer, Project Manager and System Architect
- To understand the system well

Security

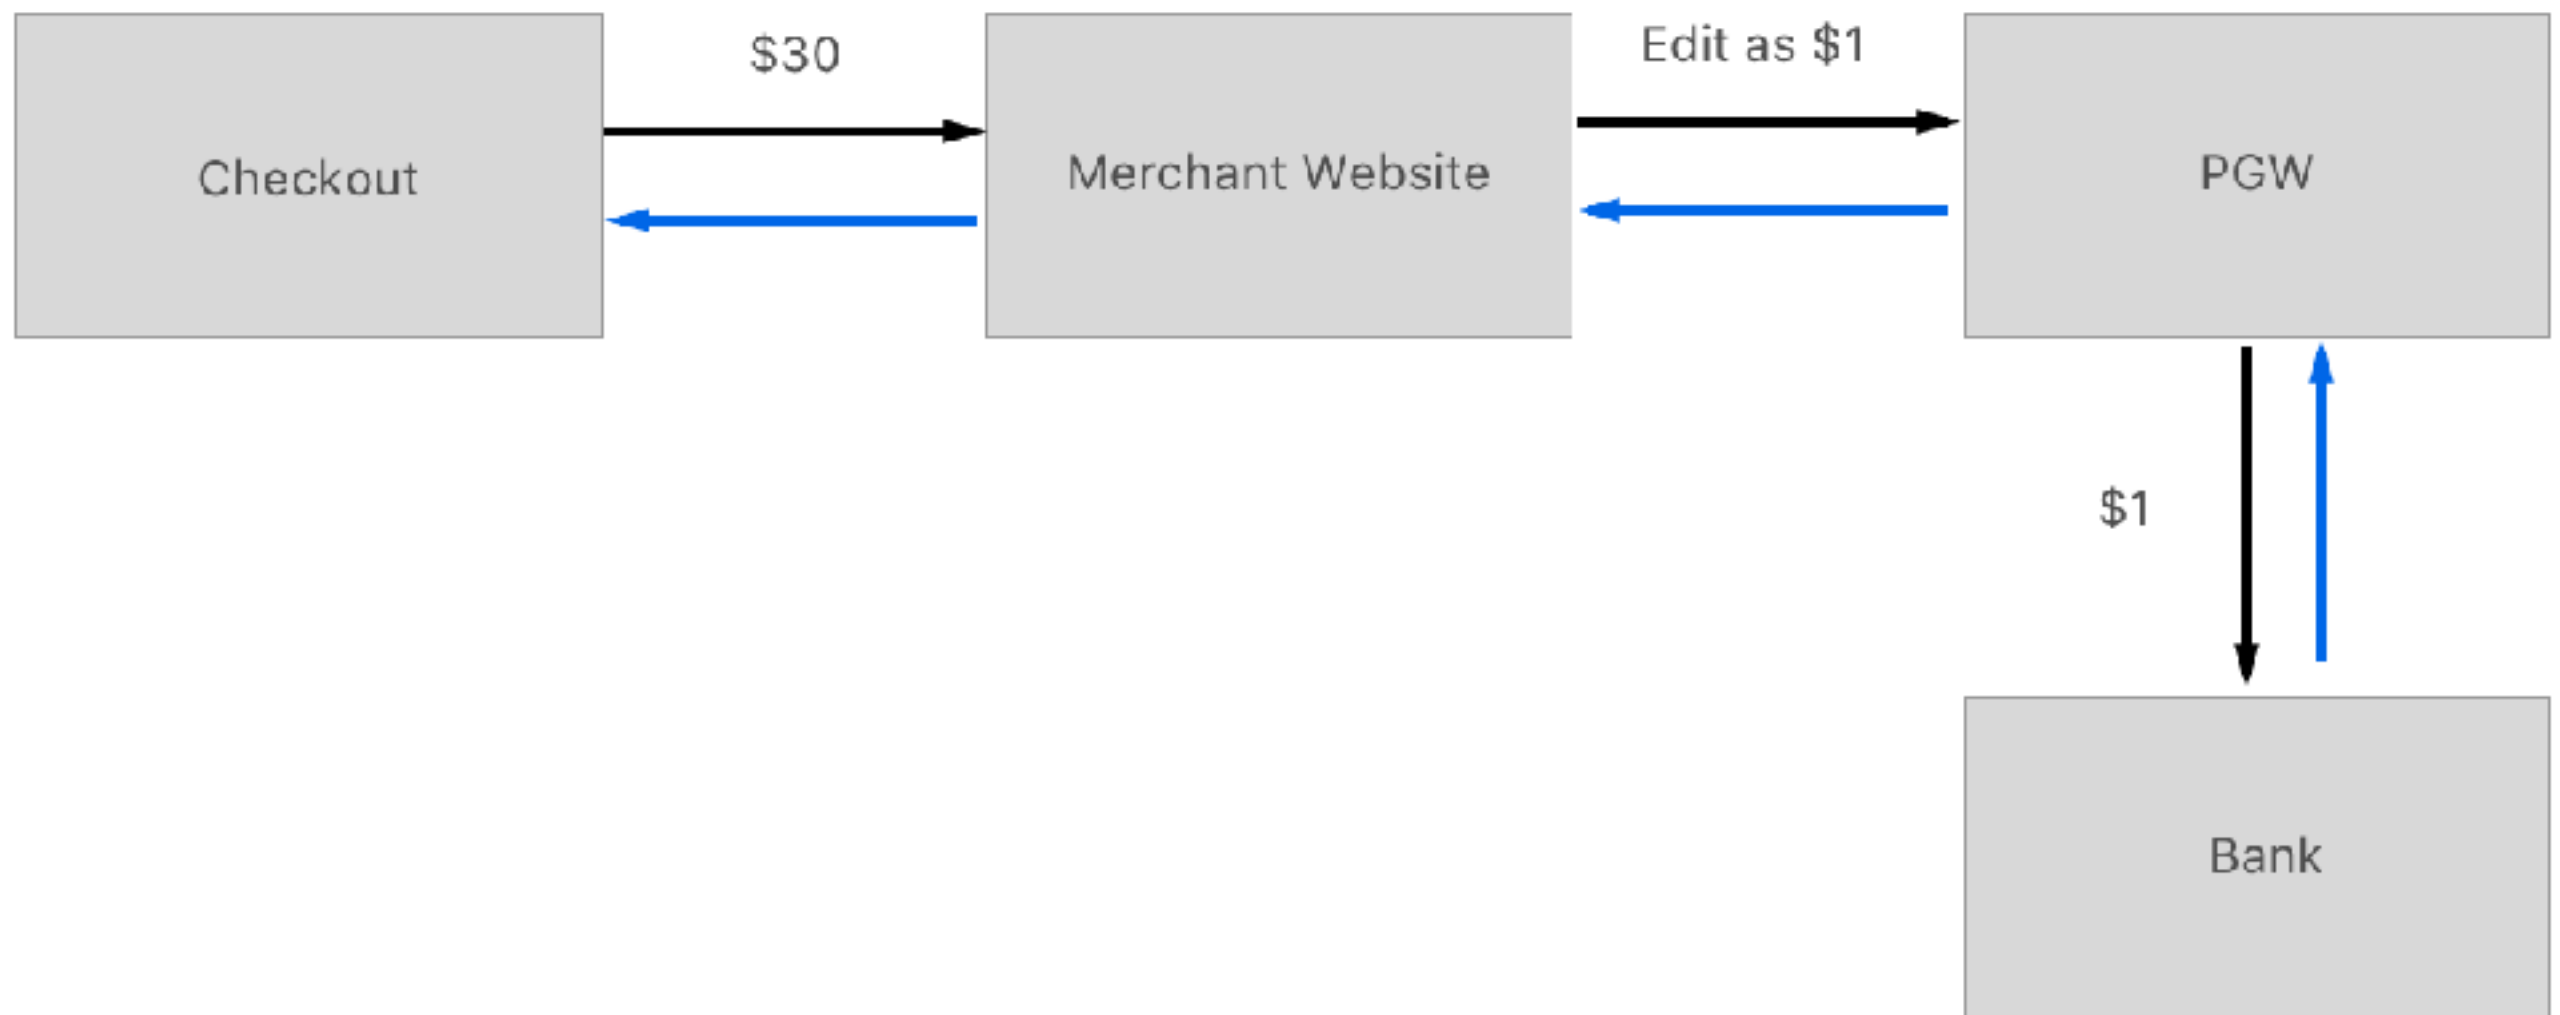

# Security

- SQL Injection ( <http://blog.saturngod.net/knowledgebase/sql-injection>)
- Cross-site scripting (XSS) (<http://excess-xss.com>)
- Cross-Site Request Forgery (CSRF)
- Play around with **Burp Suite**

# Burp Suite

# Git

# Git

- distributed version control system
- Can do branching and tag
- Your local copy is repository
- **Don't be scared of git branch merge**

# Git branching

- Master Branch is production ready
- Develop Branch is currently we are working on
- Feature Branch is for new feature

# Git Hosts

- Github (best for opensource)
- Gitlab (Unlimited Private + Public repo)
- Bitbucket (Unlimited Private + Public repo, only for 5 users)

# Self-host

- Gitlab
- Bitbucket Server (old name: Stash)
- Gogs

# Auto Deployment

# Auto Deployment

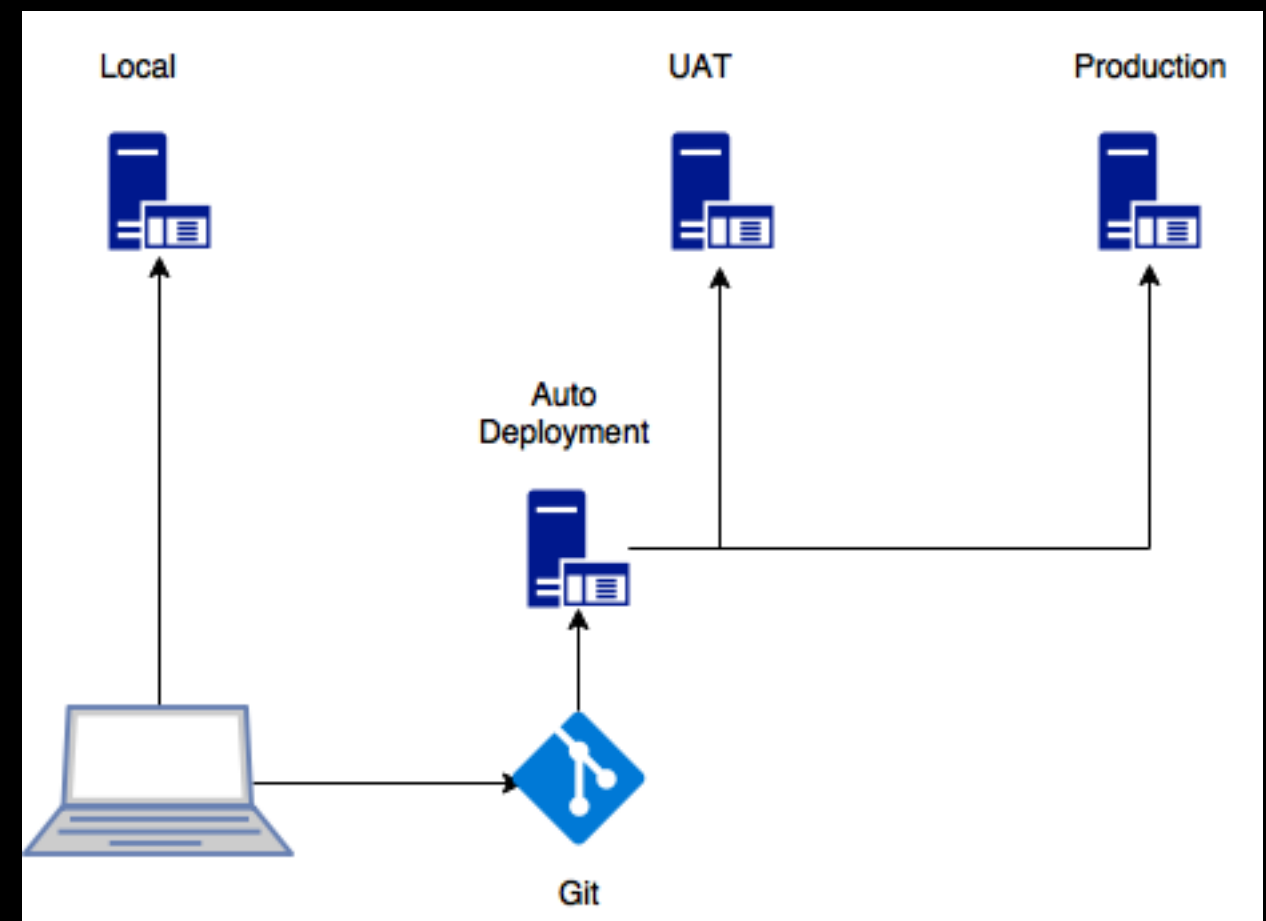

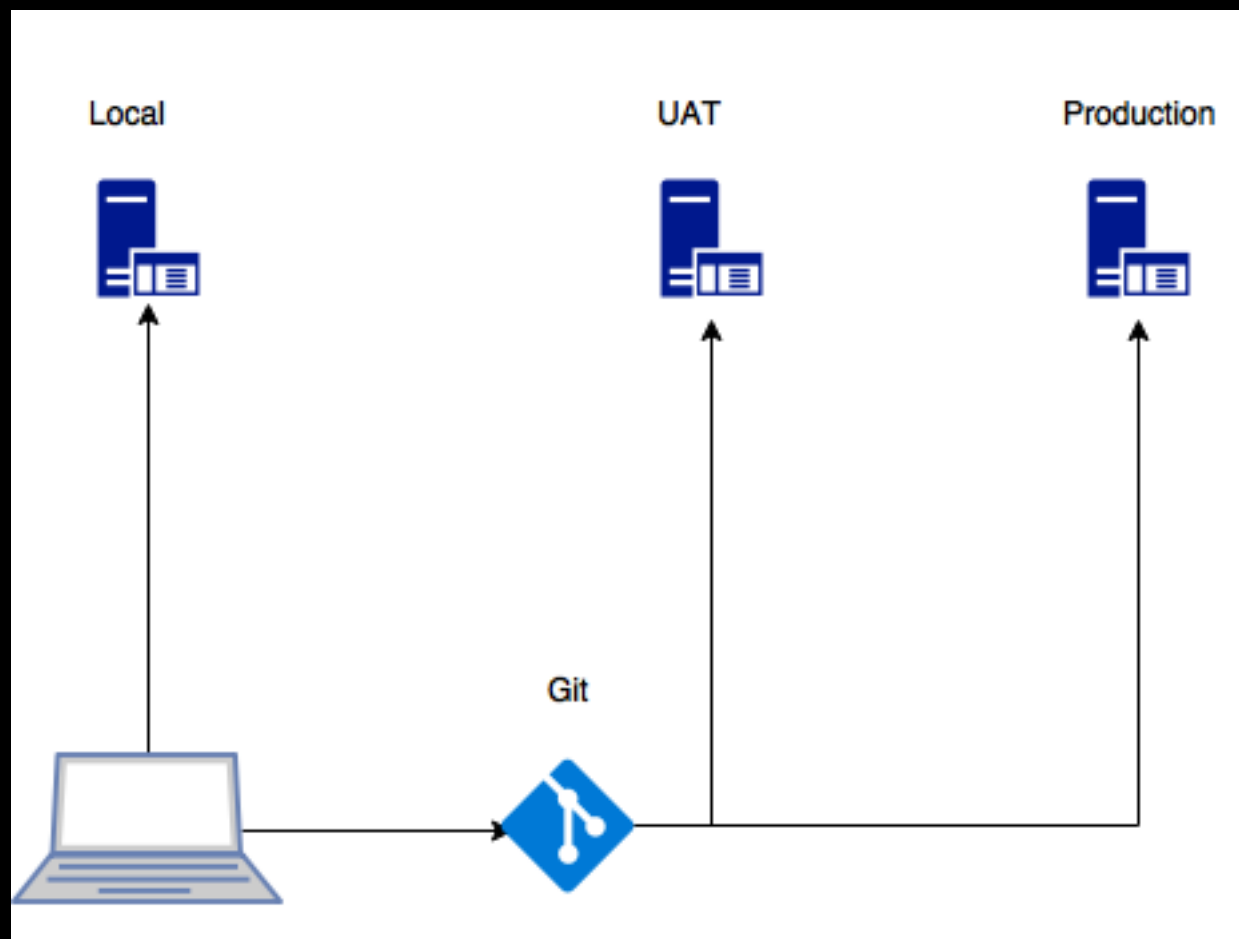

- Git Hook
- Jenkins
- Bamboo (Atlassia)

# Auto Deployment

# Auto Deployment

# Unit Testing

# Unit Testing

- Yes, it take a lot of time to write
- Start writing when you start the project
- Don't write at the end of the project (it will never happen)
- Try to build the habit of writing unit testing

Future ?

# For The Future

- Try to learn docker
- Try to learn AWS
- Try to learn new language or js framework
- Try to learn about AI or bots

# Suggestion

- Don't waste your time on **VS**
- Keep learning
- **Live as if you were to die tomorrow. Learn as if you were to live forever. (Mahatma Gandhi)**

# Thank you!
